

ADOBE® ACROBAT® CONNECT™ PROFESSIONAL

INTEGRATED AUDIO CONFERENCING

Introducing Adobe® Acrobat® Connect™ Professional with Integrated Audio Conferencing from Premiere Global Services*

Adobe has partnered with Premiere Global Services, one of the world's leaders in audio conferencing, to provide unparalleled integration between web and audio conferencing. Premiere Global Services offers a full suite of integrated audio conferencing services to meet your group communications needs, from large-scale events and small, impromptu brainstorming sessions, to international meetings with participants located around the world.

Ready, Set, Engage with Acrobat Connect Professional and Premiere Global Services

Integrated audio conferencing is essential to any successful web communication or collaborative session. Premiere Global Services provides Acrobat Connect Professional customers with integrated audio conferencing capabilities like advanced call controls, powerful participant management and synchronized meeting recording. Acrobat Connect Professional customers who choose Premiere Global as their audio conferencing provider are also eligible for specially negotiated rates for all Premiere Global's audio services.

ReadyConference® Plus: Utilize the cost-effective, easy-to-use solution that delivers the integrated audio features you need most for impromptu or scheduled meetings. You can also use ReadyConference® Plus as a stand-alone audio conferencing service.

ReadyConference® GlobalMeet™: You'll be provided with local access, ease and reliability for audio conferencing in global markets. It delivers consistent and clear audio along with innovative ReadyConference Plus features providing local access through major markets in Asia Pacific, Europe, North America and Canada.

In addition, the following operator-assisted products are available to Acrobat Connect Professional customers at a specially negotiated rate, but are not currently integrated with Acrobat Connect Professional.

PremiereCall™ Auditorium: For large-scale meetings that require a professional touch, Premiere Global offers PremiereCall operator-assisted services to ensure your meeting's success. Whether you only need the professional service of ushering your participants into the call, or full-time assistance throughout the meeting to conduct polls, Q&A and more, Premiere Global has an advanced conferencing solution to meet your needs.

Discover the Benefits of Acrobat Connect Professional with Integrated Audio Conferencing, Enhanced User Management and Advanced Call Control Features

Now Acrobat Connect Professional users can start, control and record an integrated Web and audio conference session conveniently from the Acrobat Connect Professional intuitive interface. Integration benefits include:

- **Easy to Use:** Schedule meetings, notify participants and attend conferences from one central Web interface.
- **Powerful Participant Management:** Control audio features and manage participants through a rich, intuitive Web interface.
- **Synchronize Web and Audio Recordings:** Conveniently record and stream a single, synchronized archive of your meetings.
- **Low Audio Conferencing Costs:** Audio gets billed per minute at a specially negotiated rate for Acrobat Connect Professional customers. You only pay for what you use.
- **Available on Demand 24/7:** No scheduling or reservations required.

*Available to U.S. and Canadian moderators only.

Integrated Audio Conferencing Features

Meeting Hosts

- **Start/Stop Audio Conference:** Starting a audio conference from within Acrobat Connect Professional has never been easier. Hosts can initiate and terminate a audio conference with a single click.
- **Dial Out to New Telephone Users:** Meeting hosts can dial out to other attendees in the Web conference, or add a phone-only participant by using the "Dial New Telephone User" option.
- **Change Volume for Selected Participants:** A volume slider allows the meeting host to increase or decrease the volume level for each attendee.
- **Mute Participants:** Allows the meeting host to mute all or individually selected meeting participants.
- **Put Participants on Hold:** Similar to the mute control, this feature allows participants to be placed on hold with music.

- **Hang-up Selected Participants:** One click allows hosts to remove a phone participant from the meeting.
- **Synchronized Web and Voice Recordings:** The record function simultaneously records the Web and audio conference portions of any meeting, creating a single, streaming archive.
- **24/7 Live Assistance:** Simply press *0 on your phone for live audio support.

Meeting Attendees

- **Call My Phone:** Allows attendees to enter their phone number and have Acrobat Connect Professional call them directly instead of having to dial a conference number.
- **Mute Me:** Allows attendees to mute and un-mute their phone lines.
- **Who's Speaking Indicator:** Attendees no longer have to wonder who's speaking in the audio conference. An active talker indicator next to the attendee's name makes it easy to see who is currently speaking.

Start Using Acrobat Connect Professional with Integrated Audio Conferencing Today
