

GlobalMeet® Webcast

Professional Webcasting Software and Services

GlobalMeet® Webcast, formerly Talkpoint, is the global standard for live webcasting and video streaming for enterprise and Fortune™ 500 companies. The cloud-based SaaS webcast platform provides businesses with an easy-to-use, secure and scalable environment to produce high-profile, engaging webcasts for thousands of attendees worldwide.

GlobalMeet Webcast Partnerships

We partner with many video and event production companies to facilitate webcasting events you are producing. Our reseller program for production partners enables you to resell our service at a competitive rate. Our services are geared to the corporate client who is looking for a fully branded interface with interactive capabilities and robust reporting.

GlobalMeet Webcast Benefits:

Fully Brandable Solutions. Conduct your live or on-demand presentation with slides synchronized to your audio and video, all within a branded viewer experience.

Mobile Compatibility. Your viewers can watch the presentation from any mobile device (iPhone, iPad, Android Devices), all from the same link.

Easy 5-Step Event Creation. Process allows you to create events quickly and easily.

Robust Reporting and Interactive Features. Customized reporting, Q&A, polling and social media; receive vital information about your audience and their viewing experience.

Live and Archived Webcasts. Delivered seamlessly to desktops, tablets and mobile devices. Events are archived automatically and are exact representations of the live event.

Service Level Options. From fully managed to our self-service platform, GlobalMeet Webcast empowers you to create and run events at your convenience, without the hassle of downloads.
